ORGANIZATIONAL PLANS

Carsharing is an important component in making our cities more livable. By partnering with **Ashland CarShare**, greening your “fleet”, reducing emissions and providing great access to transportation that promotes pedestrian friendly land use ***shows a public commitment to improving our quality of life.***

As an Ashland CarShare **Organizational Partner** you can:

Support Alternative Transportation- Reduce Your Carbon Footprint Promote alternative commuting solutions by providing your employees with access to a car during the day. And a hybrid vehicle at that! Carsharing provides an “errand car” perk for employees that walk, bike or use mass transit. It also helps relieve parking shortages. ***And, with our Share A Lot program, RVTD bus passes are included!***

Save Time and Money – Simplify expenses and recordkeeping For work-related driving, with an Ashland CarShare Organizational Plan you won't have to worry about the cost and hassle of owning and maintaining a car expressly for your business. Ashland CarShare is an easy, workable, and affordable alternative to car rentals or mileage reimbursements and the associated recordkeeping. You and your drivers will have **24/7** access by reservation to three conveniently located fuel efficient hybrid vehicles. ***You only pay for actual use.*** Our reservation system allows you to track usage by account codes for easy record keeping. *Additionally, personal and business driving are managed under separate accounts-with employees paying for their usage and the business paying for business related trips.*

Show you Care – We'll Toot Your Horn We appreciate your support and we want to make sure our partners are properly promoted to our members and the public. From listings on Ashland CarShare promotional materials and member correspondence, to press events and weblinks, we have a variety of options to let people know about your commitment to this valuable service.

We make it easy to do the right thing. Purchase a **Share A Little** membership for your employees personal use. Upgrade to **Share A Lot** those drivers who use the cars for your business to receive reduced hourly and daily rates. ***Go the extra mile*** and offer an upgrade incentive to those with the personal account by paying for all or part of the upgrade cost.

Carsharing...more than just a great idea!
